Mahdi JENHANI

Software Developer at Linedata | Fullstack & AI Engineer

Java / Spring / Angular | LLM & RAG Applications

Tunis | (+216) 50 406 880 | mahdijenhani00@gmail.com | linkedin | github | portfolio

Education

National School of Engineers of Carthage (ENICarthage) **Sept 2023 – July 2026**
National Degree in Computer Engineering *Tunis, Tunisia*

Higher Institute of Technological Studies (ISET) **Sept 2020 – June 2023**
National Degree in Information Technology (undergraduate program) *Kelibia, Tunisia*

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, PHP, C/C++
Frontend: Angular, React, Next.js, Tailwind CSS
Backend / API: Spring Framework, Spring Boot, Node.js, Express.js, FastAPI, JWT Authentication
Databases: PostgreSQL, MySQL, Supabase, Oracle (PL/SQL), MongoDB
Tools: Docker, Git/GitHub, Maven, Tomcat, JBoss, Jira, Streamlit

Professional Experience

Linedata | ***Software Developer*** **Aug 2026 – Present**
EKIP — End-to-End Financing & Leasing Software Solution *Tunis, Tunisia*

- Build new features and maintain EKIP, Linedata's end-to-end financing and leasing software solution.
- Develop in Java and XML on a Spring-based framework with Angular, using PL/SQL for business logic.

Tech Stack: Java, Spring, Angular, XML, PL/SQL, Maven, Tomcat, JBoss

Linedata | ***AI Engineer Intern (Final Year Project)*** **Feb 2026 – July 2026**
EKIP API Assistant — AI Assistant for API Discovery & Chaining *Tunis, Tunisia*

- Built a RAG assistant helping integrators chain EKIP360 APIs, using 8,621 real API sequences from screen code.
- Enriched 2,000+ API docs with an LLM; built hybrid search, Human-in-the-Loop feedback, and LLM-as-a-Judge.

Tech Stack: Python, FastAPI, React, LLMs, RAG, Sentence-BERT, FAISS, BM25

Cabinet Vital | ***Data Science Intern*** **July 2025 – Aug 2025**
LeadSense — Insurance Lead Prioritization Dashboard » Github » Demo *Remote*

- Developed a Streamlit dashboard to analyze and prioritize 16,000 leads using Python data processing.
- Implemented advanced features: lead scoring, unsupervised clustering, and interactive Plotly visualizations.

Tech Stack: Python, Streamlit, Pandas, NumPy, Plotly, Scikit-learn

HorizonLux | ***Fullstack Developer Intern*** **Feb 2023 – May 2023**
ProjectFlow — Project Management System *Kelibia, Tunisia*

- Developed a project monitoring system with a responsive React interface for progress tracking.
- Designed the backend using Supabase: RESTful APIs, secure authentication, and PostgreSQL data management.

Tech Stack: React, Ant Design, JavaScript, Supabase, PostgreSQL

Projects

EventHub — Event Management Platform » *GitHub* » *Demo*

- Orchestrated a full ecosystem featuring Angular dashboards (role-based access) and responsive UI.
- Engineered Spring Boot services: full CRUD functionality for event management, real-time notifications via WebSockets, JWT security, RSVP system, and PostgreSQL persistence.

Tech Stack: Spring Boot, Java, Angular, TypeScript, PostgreSQL, Spring Security, WebSocket/STOMP, Docker

MovieMate — Movie Recommendation Platform » *GitHub* » *Demo*

- Developed a recommendation UI with React and Tailwind CSS, ensuring a seamless user experience.
- Integrated user management, ratings, and watchlists with a hybrid recommendation engine.

Tech Stack: React, Tailwind, Express, Node.js, JWT, PostgreSQL, FastAPI, PyTorch, Scikit-learn, Docker

Languages

French: Fluent (B2) | **English:** Fluent (B2 – TOEIC 865) | **Arabic:** Native

Extracurricular Activities

General Secretary, The Changers Club (2021) • **Member**, IEEE ENICarthage Student Branch (2023-2024)
